

Users Manual

History Killer removes confidential information in temporary or stray files that you want to protect from others. Simultaneously also increases disk space by removing temporary files.

How it is better than other software:

Compared to other software which only remove Internet history and cost around dollars 30-60, this software removes history of many programs and is totally free.

1. Very easy to install.
2. Quicker and small. 325 KB only.
3. Compatible to all versions of Windows.
4. Selectable stay-on-top feature.
5. Very easy to configure. Right click menu.
6. Can be dragged to any convenient place on the desktop.
7. Closes all Internet explorers automatically.
8. Clears last visited URLs.
9. Deletes temporary files, recovering disk space.
10. Clears media player opened file list.
11. Clears opened file list of WordPad.
12. Clears opened file list of Paintbrush.
13. Clears opened file lists of MS Word
14. Clears opened file lists of MS Access
15. Clears opened file lists of MS Excel.
16. Clears opened file lists of MS Power Point.
17. Clears recently opened documents list of Start Menu.

Installing History Killer

History Killer is very easy to install. Please go through the following steps to install it:

Download it from the download section to your desired directory.

Double click the History Killer icon.

The program will be installed automatically, and will appear on the desktop in the form of a single button.

It will be on the desktop at every boot.

Using History Killer

Using History Killer is simple:

1 To clear History

Press Left mouse button on the *Clear History* button and the history clearing process will start.

2 Program Selection

Press Right Mouse button on the *Clear History* button, a pop-up menu will appear. Select the programs whose history you want to clear. The selected options will acquire tick marks across them.

3 Desktop Placement

Press Left mouse button on the Border and drag the whole button to the desired position on the desktop. The program will memorize its current position.

4 Removing History Killer

To remove the program permanently, press *Remove This Program* in the pop-up menu. The message box will confirm whether you want to quit program or whether you want to remove it permanently.
